UGA Geography's Weekly Newsletter

Exploring The Center for Geospatial Research (CGR)

CGR's New Website Highlights Updated Suite of Capabilities and Opportunities

UGA's [Center for Geospatial Research](#), located in the [Department of Geography](#), has introduced a re-vamped website to promote its updated suite of monitoring capabilities and opportunities. In a recent [UGA Columns](#) article, Communications Director and writer Alan Flurry explores the new site:

Since 1985, the UGA Center for Geospatial Research has been dedicated to advancing remote sensing, mapping, and geospatial research. Along with the technological changes over that nearly 40 year history, the center's technical capacities have grown to reflect the advanced capabilities of today in environmental remote sensing and GeoAI, photogrammetry, small satellite development, and graduate and undergraduate training.

In service of promoting its updated suite of monitoring capabilities and opportunities, the CGR launched a re-vamped website, including a new page detailing its [drone services](#) for the first time.

"Our goal is to be the go-to place for anyone who needs drone data/processing and support, within and outside of UGA," said Deepak Mishra, Merle C. Prunty, Jr. Professor & associate head of the department of geography and director of the CGR. "Our ultimate sim is to make this center a premier Geospatial Center by taking advantage of the boom in GeoAI, satellite remote sensing, and other geospatial technologies."

The [Drone Services](#) page has a form visitors can use to request data collections. This will allow for CGR to become the go-to-place for drone data acquisition at UGA. The service benefits multiple groups inside and outside UGA and will help bring resources to CGR.

A [chronology page](#) highlights important moments for CGR over these past 39 years, including recognition by NASA and ESRI, distinguished positions by leadership, as well as project results being presented to President Jimmy Carter in support of humanitarian efforts by The Carter Center

The [students page](#) includes multiple possibilities to feature student's work. Hovering over a student's photo brings icons that link to the student's project page, department page or LinkedIn

[Grants received](#) by Dr. Madden, Dr. Mishra, and Dr. Bernardes are listed. Total received in grants, corrected for 2024 dollars, is over US\$47 million.

The [Publications page](#) has filter capabilities, so people can look for articles by a specific author, year or keyword.

The CGR invites the community to visit the site and inquire about their services.

General News and Announcements

The Graticule Weekly is distributed each Friday Afternoon. If you have any news or events you'd like to share throughout the semester, please share them the Geography Department's Communication Coordinator well in advance. Past editions of The Graticule Weekly are available to view on our website!

With the Fall semester in full swing, our community remains busy as faculty, staff, students, and visitors navigate our campus. Prioritize your transportation safety and the safety of other's by checking out [the Watch For Dawgs official website](#).

Please download the new UGA Safe app from the Google Play or Apple App stores. Login using your UGA MyID or register as a guest to take advantage of a variety of safety features. For more information, please visit the [UGA Office of Emergency Preparedness website](#).

OPPORTUNITIES & ANNOUNCEMENTS

- **GIS Transportation Internship**

The Northeast Georgia Regional Commission (NEGRC) is seeking a qualified GIS (Geographic Information System) Transportation Intern within its Planning & Government Services (PGS) Division. The GIS Transportation Intern will assist PGS staff with GIS work related to transportation infrastructure mapping in the Northeast Georgia region through the Roadway Element Validation and Mapping Program (REVAMP) and other general planning related activities. Responsibilities will include data validation, capture, and creation, as well as the development of maps and graphics. This position will primarily involve in-office work, with flexible scheduling to accommodate academic schedules as appropriate.

The ideal candidate will have experience and a working knowledge in GIS technology including, but not limited to: spatial data analysis and maintenance, design, and cartography. Experience in Esri products (ArcGIS Pro) is a requirement.

The NEGRC provides services to 12 counties and 54 cities in Northeast Georgia through its offices located in Athens, GA. This position reports to the NEGRC's GIS Planner. For more information on the NEGRC's PGS Division, visit <https://negrc.org/planning-government-services>.

Minimum Qualifications: Training & Experience Requirements Undergraduate degree or in the process of obtaining an undergraduate degree from an accredited college or university with GIS experience. The ideal candidate will be a student currently enrolled in a planning, geography, or similar graduate program that has already completed GIS coursework and has an interest in transportation planning.

To Apply Submit a resume and cover letter to: Amber Bailey, HR Manager, abailey@negrc.org -ORMail to: Northeast Georgia Regional Commission, Attn: Amber Bailey, 305 Research Drive, Athens, GA 30605-2795. Review of applicants will begin on December 1, 2024 and continue until an applicant is selected. No telephone inquiries accepted. Position open until filled. The NEGRC is an Affirmative Action/Equal Opportunity Employer.

- **Full-time AmeriCorps VISTA roles**

From Coleman Allums, Office of Service Learning Community Food Fellows Program Coordinator - I wanted to share this [job posting](#) with you in hopes you might share out with grads/undergrads in the department. We're recruiting for a few full-time AmeriCorps VISTA roles to begin in January. The focus of the work will be on building capacity for food security organizations around town—the placements we have remaining are with the Food Bank of NE GA, the Athens Community Council on Aging, and Abundance Athens/UGA OSL. VISTAs would be embedded with one of these three organizations for their service year. If there is anyone graduating this fall term, this position would be timed perfectly!

OPPORTUNITIES & ANNOUNCEMENTS

- [The Willson Center Graduate Research Award for Arts & Humanities projects](#)

The Willson Center Graduate Research Award provides support of up to \$1,250 toward research and practice-related expenses for arts and humanities projects that are essential components of a graduate degree program. Applicants should explain the importance of their proposed activity and justify it within their field(s) of study in a context of research excellence. The Willson Center is particularly interested in fostering interdisciplinary research at the graduate level.

Application is open to any humanities and arts graduate student registered for an advanced degree. Previous Willson Center Graduate Research Award recipients are ineligible. Graduate students may be supported in travel to archives, installations and performances, and other sites related to their research or creative activity. Applicants who give a lecture or presentation of their work at another institution during the award of this grant must recognize the Willson Center as a source of support.

Deadline to apply for Current year award: Feb. 14.

Travel to Conferences and Professional Meetings

Applicants who are applying for travel support to present a paper at a domestic conference are encouraged to direct their request to the [Graduate School](#).

[Click for more information, and to apply.](#)

- [Tenure-Track Assistant Professor in Human-Environment Geography at University of Minnesota Duluth](#)

The Geography Program at the University of Minnesota Duluth invites applications for a tenure-track Assistant Professor in Human-Environment Geography that will begin August 18, 2025. This is a full-time, 9-month position. We seek a dynamic and innovative scholar whose research and teaching lie at the nexus of human-environment geography and sustainability, and who will contribute to the university's land grant and sea-grant missions. The successful candidate will demonstrate a commitment to place-based education that addresses critical issues in sustainability.

Our program offers a B.A. in Environment, Sustainability, and Geography, a B.S. in Geographic Information Science, and our faculty contribute to cross disciplinary graduate programs across campus. We are particularly interested in a candidate who can contribute to our existing programmatic strengths, while adding intellectual diversity to the Program in Geography in one or more of the following areas: environmental justice; energy systems and transitions; environmental health; climate change resiliency; environment and migration; or food systems. Scholars who utilize Geographic Information Systems (GIS) are especially encouraged to apply.

How to apply:

For the full posting and the link to apply, visit employment.umn.edu and search Job ID# 365093.

- [Tenure-Track Assistant Professor in Applied GIS / Geographic Information Science James Madison University](#)

The Geography program in the School of Integrated Sciences (SIS) at James Madison University invites applications for two tenure-track assistant professor positions in applied GIS starting August 2025, part of a broader hiring initiative across SIS themed "Technology for Resilient Futures." We are seeking colleagues who can integrate and develop GIS and geospatial technology to build our students' skills and bring new understanding to critical environmental and human challenges.

Primary course area assignments for this hire will include introductory GIS and, depending on the areas of expertise, classes in programming, intermediate and advanced GIS, qualitative GIS, field technology, data analysis, cartography/visualization, or other applied GIS upper-level offerings.

- [Research Opportunities with the Community Mapping Lab](#)

The Community Mapping Lab (CML) is looking for up to two undergraduate students to work as research assistants this spring. The CML has been doing collaborative work with Historic Athens and other area residents to create maps that show the history of the Reese Street neighborhood. Located near downtown between Broad St. and Prince Ave., Reese Street was once a major hub of Black life in Athens. Drawing on city directory data and conversations with community elders, students will help develop a virtual walking tour of the area that helps preserve and promote its history.

Students should have some familiarity with GIS, especially ArcGIS Online, before starting in this position. Previous experience with qualitative research is also welcome, though not expected.

If selected, students can apply for funding through the [CURO program](#), which has a deadline of November 1st. Students can also register for credit hours under Geog4960R if desired.

Interested students can reach out to jshannon@uga.edu with a CV/resume and a brief description of relevant experience/interests.

STUDENT & FACULTY OPPORTUNITIES

- [Job opening: Assistant Professor, Sustainable Cities at UNC Charlotte](#)

The Department of Earth, Environmental and Geographical Sciences (<https://geoearth.charlotte.edu/>) in the College of Humanities & Earth and Social Sciences at the University of North Carolina at Charlotte invites applications for a tenure-track appointment at the rank of Assistant Professor in the area of Sustainable Cities (broadly understood) to begin on August 11, 2025.

This is a joint appointment between the Department of Earth, Environmental and Geographical Sciences (75%) and UNC Charlotte's School of Data Science (25%). The salary range for the position is \$79,500-\$82,500 plus stipend. We seek a dynamic and broadly trained urban geographer who can theorize about the spatial dimensions of critical sustainability issues facing cities today, including but not limited to urban inequalities, housing affordability, transportation accessibility, clean energy/energy efficiency, and/or sustainable urbanization and land use.

- [Collegiate Assistant Professor in Meteorology](#)

The Department of Geography at Virginia Tech is seeking applicants for the position of Collegiate Assistant Professor in the area of meteorology. This is a full-time, 9-month appointment with an anticipated start date of August 2025.

We seek candidates with a passion for undergraduate instruction in meteorology who are able to offer courses in some combination of weather analysis and forecasting, mesoscale meteorology, atmospheric remote sensing, and other courses within the candidate's area of expertise.

[Learn More & Apply Here!](#)

- [Auburn U - Postdoctoral Fellow - Community Geography and Community GIS](#)

The Department of Geosciences at Auburn University invites applications for a new Postdoctoral Fellow position in Community Geography and Community Geographic Information Systems.

The successful candidate will co-lead the Citizen Science GIS lab's broader research and education efforts (e.g., community geography, GIS, UAV/drones, geoscience education, student mentoring, fieldwork, and outreach).
